

## GLOBALG.A.P. FOOD SAFETY MODERNIZATION ACT PRODUCE SAFETY RULE ADD-ON

In the United States (US), the Food and Drug Administration (FDA) Food Safety Modernization Act (FSMA) requires specific practices to be implemented and followed for the production, handling, and import of food products. To support implementation efforts at producer level, GLOBALG.A.P. offers an add-on to the Integrated Farm Assurance (IFA) standard for fruit and vegetables to address the requirements in the FSMA Produce Safety Rule (FSMA PSR).

**PROVIDES COMPLETE COVERAGE** of the FSMA PSR requirements for US-based and international producers who grow fruit and vegetables for the US market

**ENSURES EFFICIENCY** for producers by combining the FSMA PSR add-on assessment with their annual IFA audit

**DELIVERS CREDIBLE VERIFICATION** of a producer's efforts toward FSMA PSR implementation in the form of a certificate of conformance and audit report issued by GLOBALG.A.P. approved certification bodies

**PREPARES EXPORTERS** to be "FSMA ready" with products entering the US market

**ASSURES IMPORTERS** that their foreign suppliers are meeting the verification requirements of the Foreign Supplier Verification Program

**ENABLES TRANSPARENT ONLINE VALIDATION** of a producer's compliance status in real time through the GLOBALG.A.P. IT systems

GLOBALG.A.P. offers multiple GFSI-recognized certificate options in alignment with FSMA requirements for farms and packing facilities. Scan the code to learn more.

The FSMA PSR add-on is already in use by 3,600 producers in 17 countries to sell 85 commodities in the US market.

The FSMA PSR add-on certificate of conformance is not an assurance or guarantee of FSMA compliance, as legal compliance can only be determined by a US regulatory authority such as the FDA.
